

WINNING THE FUTURE THROUGH INNOVATION

Wet Cleaning[®]

Using water to take care
of delicate garments

DRY TO DRY PROCESS

Wet Cleaning Process:
PRE-SPOTTING - WASHING - DRYING - FINISHING

The Wet Cleaning system brings back the cleanliness and freshness to the most delicate garments, with **the use of water.**

Thanks to our constant development we got the best washing, drying and finishing programs, especially thought for clothes which need the best treatment.

Wet Cleaning

Wet Cleaning[®]

The optimal and balanced process for the professional washing **SUCCESS**

The best solution for its **efficacy**

80%

Nowadays 80% of stains are soluble in water (Wet Cleaning concept).

Then...
Why is the market still using machines which are only prepared to clean 20% of stains?

The solution is **Wet Cleaning**.

20%

Only 20% of stains are not soluble in water (Dry Cleaning concept).

All type of garments

TYPE OF STAIN	DRY CLEANING	WET CLEANING
Sweat	2	5
Proteins	1	5
Grease	5	4
Body odors	1	5
Shrinking	3,5	3

DRY vs WET comparison in most common stains.
1=bad result / 5= excellent result

Important icons for Wet Cleaning

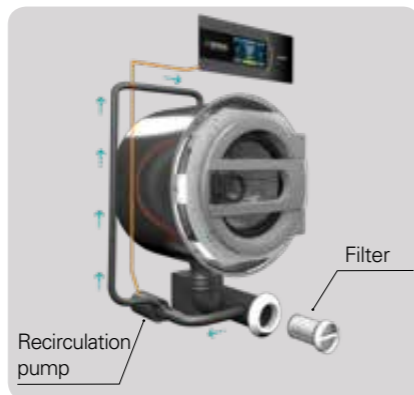

LIQUID DOSING
Dosing at the right time, with the necessary amount, gives us security during the process and homogeneity in the result. And the most important thing: tranquility.

8 dosis signals as standard + 6 extra signals (dosing time, delay, start selection) for all models.

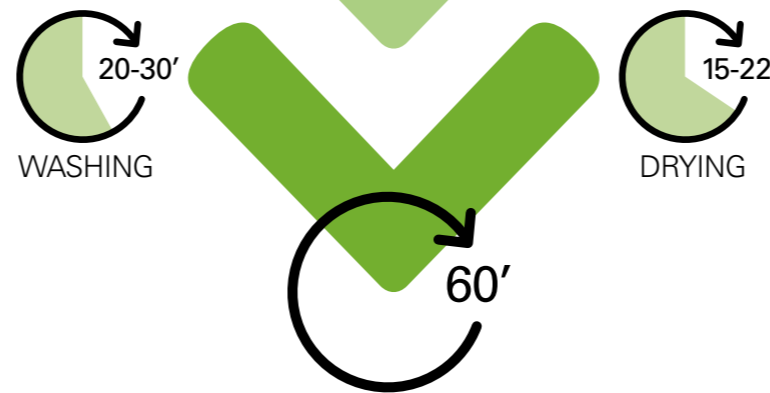

TOTAL CONTROL WITH TOUCH II
Easy programming through icons, with touchscreen directly on the machine or with the computer and Wash Control software.

WATER RE-CYCLE
Optional kit to increase the care of the linen: recirculation of the bath water, which increases the water flow with chemicals, shortens the cycle and improves the effectiveness without mechanical action.

WASHING DRYING

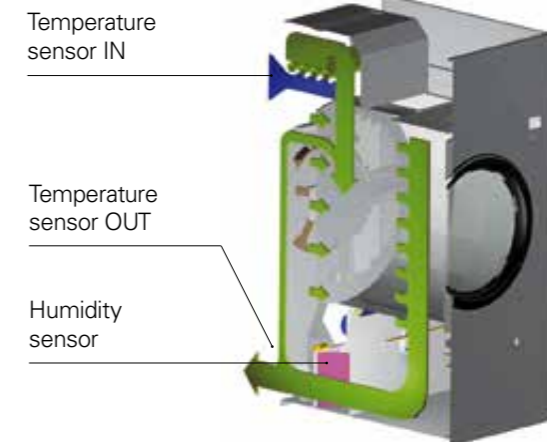

DRY TO DRY
IN 1 HOUR

TEMPERATURE CONTROL
Temperature and air-flow control result in the perfect drying for delicate garments. The humidity sensor helps to shorten the drying process, thus ensuring the appropriate humidity level for the subsequent ironing of garments.

ECOENERGY

- AIR RE-CYCLE
- EFFICIENT DRY
- THERMAL INSULATION
- FULL FLOW
- SFEX

Wet Cleaning®

WASHERS Heavy professional and industrial

DOMUS heavy professional and industrial washers with new TOUCH II microprocessor (and software) offer a user-friendly and ideal programming for Wet Cleaning system.

All models, from 8 to 120kg, are equipped with outstanding features like drum and tub in stainless steel, Hot & Cold Mix (automatic water mixing), Efficient Drum to improve the mechanical action, etc.

HPW-8/10

DHS-14 ECO-ENERGY

DRYERS Heavy professional and industrial

DOMUS heavy professional and industrial dryers with new TOUCH II microprocessor offer a variety of ranges and capacities from 8 to 80kg.

The ECO-ENERGY range is equipped with ideal features to ensure the best results: Air Re-cycle (air recovery), with an intelligent humidity sensor, panels and air circuit with thermal insulation, stainless steel drum, reversing drum, Soft Dry: stamped holes in the drum to take care of delicate garments.

HPD-8/10

DTT-18 ECO-ENERGY

STACK The professional duo

The easiest and most economical way to get started in the Wet Cleaning process. STACK is the most accessible solution of Wet Cleaning for 8 and 10 kg machines, that is to say, 4.5 and 6 kg of delicate garments.

As well as industrial machines, STACK includes easy programming TOUCH II control to obtain a better functionality and performance.

HPW-8 + HPD-8 TOUCH II

ECOTANK Water recovery tanks

Perfect system to recover water and chemicals from the different washing phases. We can premix chemicals with water before its use.

ECOTANK

Mannequins

Automated working cycles. Electronic card. Possibility to set nine different cycles, and regulation of steaming and drying time. Adjustable shoulder width and height of the dummy. Rotation 360° of dummy support (frame) and controls.

MAC-COAT-C without boiler - to be connected to a central steam supply. For the finishing of coats and similars.

MAC-COAT-C

RECOVERY TANK

+

STEAM GENERATOR

TABLES Finishing

VACUUM, UP-STEAMING AND BLOWING IRONING TABLES

Available either with built-in electric steam boiler and vacuum unit, or to be connected to an external steam and vacuum supply. It can be supplied in the following versions:

TPC - VBA: with built-in steam boiler of 7 litres-capacity, with standard board (1200 x 400 x 250 mm).

TP - VBA: without boiler, with standard ironing board (1200 x 400 x 250 mm).

TPC-VBA WITH LIGHTING

TP-VBA

Topper

Finishing topper for trousers with air-operated waistband and leg stretching device, for central steam and compressed air supply.

Side waistband stretching device. Height adjustable leg stretching carriage and stainless steel leg clamps. Built-in three-phase fan; air heating device. Electronic card for the setting of nine ironing cycles in total. Ironing cycle controlling: steaming time, steam/air time, drying time. Three pressure regulators (for leg clamps, waistband stretcher and leg stretching carriage). Switch for the exclusion of the leg stretching carriage. Manual size indicator. Mechanical airflow regulator.
