HPL CUBE

DHS CUBE

OPTIONS

- Gas bottles cupboard for dryers.

Modular structure made in iron S275JR, with pickling, metallization and finishing treatment. External coverage in a 40 mm sandwich panel and waterproofing PVC membrane. The facade cladding is in galvanized sheet metal with Domus lacquered finish. All fixings and accessories necessary to guarantee the quality of the assembly are included.

BACK SIDE - MACHINES

Fully installed and tested machines, the connection installations are Plug and Play. The interior installation is prepared for easy access, with approved electrical panel and installation in sight, protected, easy to interpret. The hot and cold water installation works with separate taps to facilitate disconnection. Boiler already installed. The fumes outlet of the dryer is located at the top, with a hat. The module is mounted on the same floor where it has to be installed, which facilitates the installation of drain outlets.

FRONT PUBLIC SIDE

5 + 5 laminated transparent glass cladding fixed with carpentry. Viroc panel treated flooring. Electrical installation with led light and folding table with a stool to sit. Opening on one side for entry to this always open area.

TRANSPORT

- Crane recommended for unloading. Eyebolts included.
- No towing required. A truck with a load capacity of 8 meters can be used for the 3,5m. module, room, glasses and gas cupboard.
